Re: L. E. Carpenter & Company Site, Wharton, NJ  
Site Analysis Report from the  
EPA Environmental Photography Interpretation Center

Dear Ms. Purcell:

As discussed with you on January 2, 1992, the Environmental Protection Agency (EPA) has compiled and analyzed historical aerial photographs of the L. E. Carpenter & Company Site (and vicinity) and has prepared a Site Analysis Report based on this work. While I understand that New Jersey Department of Environmental Protection and Energy (NJDEPE) already has a collection of aerial photographs of the site, the EPA Site Analysis Report may also be of use to NJDEPE. Therefore, I have enclosed three copies of the report for your use.

We also discussed the status of the attempts to find the endangered plant, the swamp pink, in the vicinity of the site. You informed me that you are looking into this matter.

Please feel free to contact me at 212 264-8098 if you wish to discuss the L. E. Carpenter & Company Site.

Sincerely yours,

Jonathan Josephs, Project Manager  
New Jersey Superfund Branch II  
Emergency and Remedial Response Division
